Experience

Danske Bank / Associate Software Engineer

August 2021 - April 2023, BANGALORE

I was part of the Tax Reporting Team where I contributed to developing tax-compliance systems.

- Developed UI in React for GDPR application that sends data to the customers.
- Actively participated and resolved bugs in FATCA CRS runs.
- Migrated starTRACS from Openshift-3 to Openshift-4
- Developed and maintained CI/CD pipelines of starTRACS and GDPR Go.

Danske Bank / Software Developer Intern

February 2021 - August 2021, BANGALORE

- Created UI in React for DAC-6 EU directive.
- Created Backend APIs for DAC-6 in Spring Boot
- Designed the UI in Figma, conducted surveys, interviewed stakeholders and end-users.

Codevector Pvt. Ltd. / Frontend Intern

June 2020- August 2020, KOLKATA

- Worked with a senior developer to deliver a netflix-like application in React.
 - Ensured that the codebase was easily comprehensible for backend developers.
-

Education

Vellore Institute of Technology / B.Tech IT

July 2017 - June 2021, Vellore

Georg-August-Universität Göttingen

April 2023 - Presne, Göttingen

Pursuing MSc. Applied Computer Science

Awards

- Contributions to help the firm save hefty fines.
- Maintained 3 projects in different tech-stacks as a fresher.
- 3rd Place in the university Math-a-thon.

Personal Projects

Influencer Marketing System

Developed a robust influencer marketing system utilizing php as the backend, MySQL as the database management system, and HTML, CSS and javascript for frontend.

GitHub Finder

GitHub Finder is a web application designed to search and explore GitHub user profiles and repositories. The frontend of this application has been developed using Vanilla JS.

Blood Bank Management System

The Blood Bank Management System is a comprehensive software application developed using SQL. This system is designed to efficiently manage and track various aspects related to blood donations, inventory, and distribution within a blood bank or healthcare organization.

STREAKS

Designed UI in Figma for Habit-building application named "STREAKS". I created 6 screens for a mobile application.

Rajnikant Jokes

Created an innovative voice assistant skill for Alexa that generates random jokes centered around the renowned Indian movie star Rajinikanth. Leveraging Alexa Skills Kit and the power of natural language processing, this skill offers an interactive and entertaining experience for users
